

NDNts: NDN Libraries for the Modern Web

Junxiao Shi, yoursunny.com

(NDNts is a personal project; ISC license)

Introducing NDNts

- Modern JavaScript libraries.

- Works in Node.js and browsers.

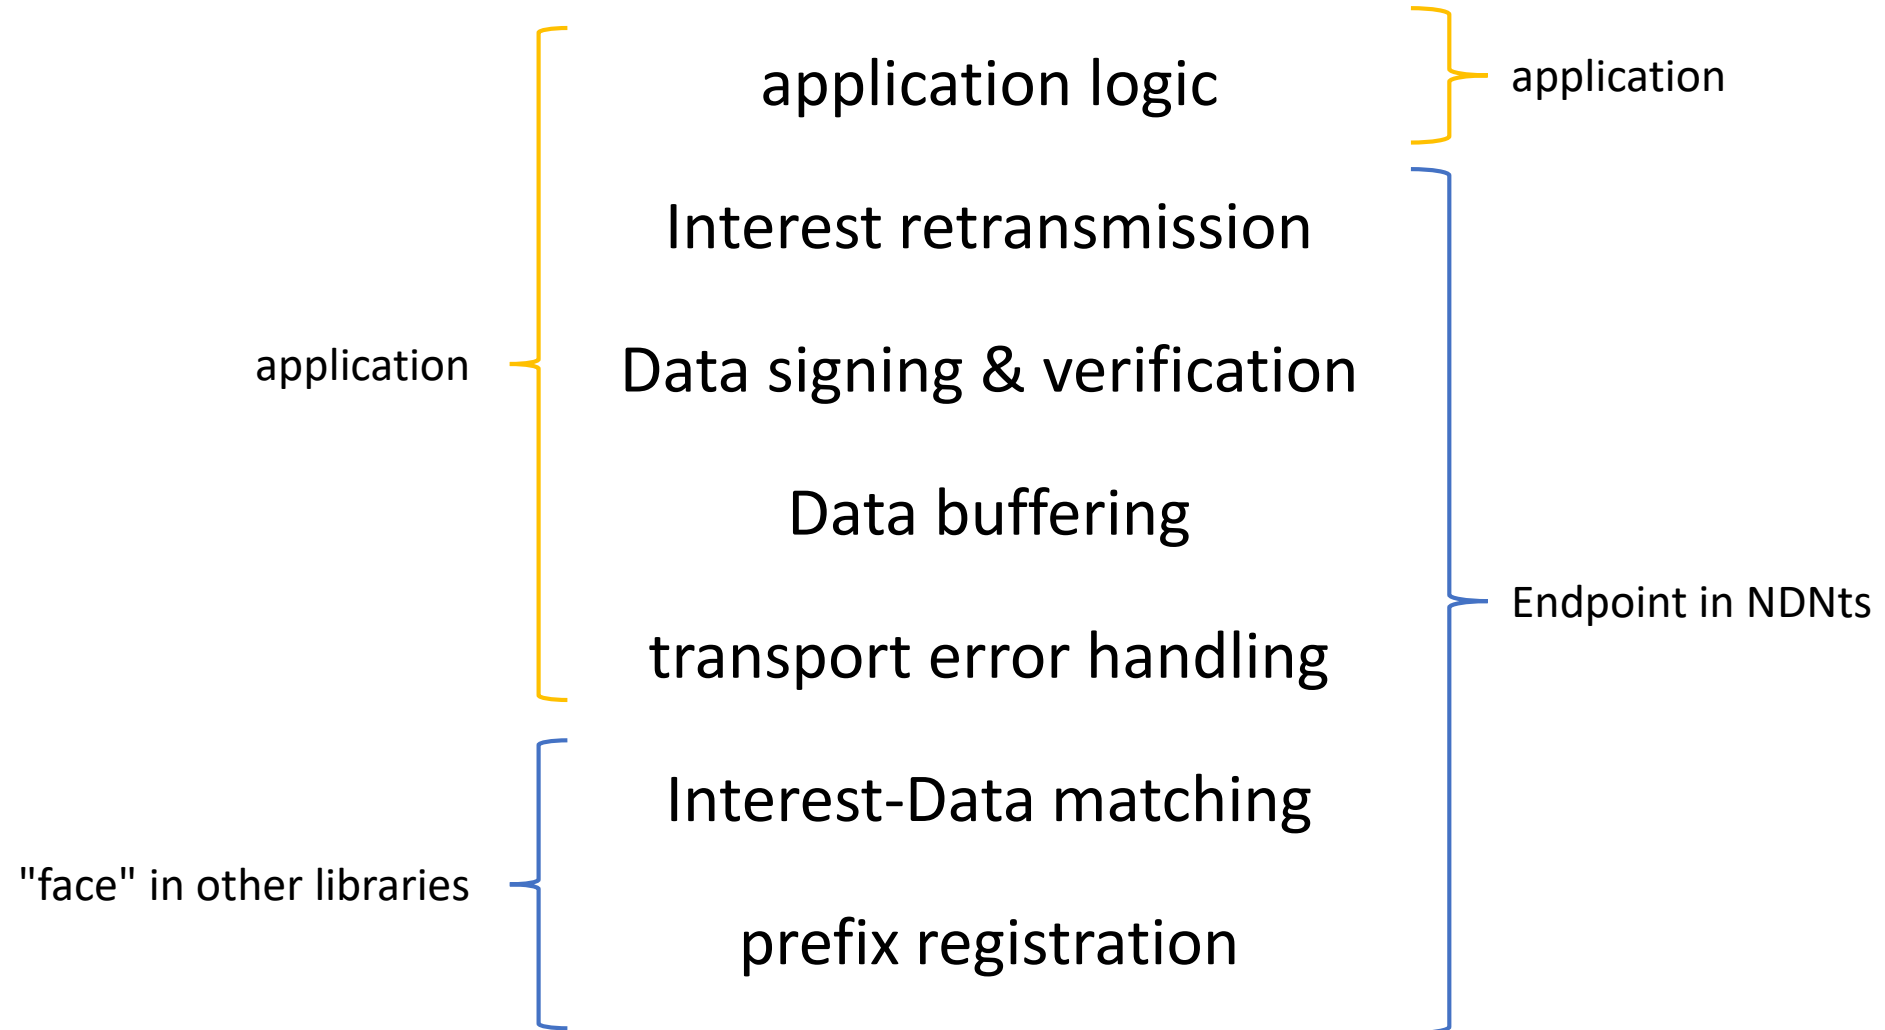

- >90% test coverage.
- Automated & manual browser tests on desktop / Android / iOS.

- Standalone without forwarder.
 - Or connect to NFD / NDN-DPDK.
- Actively maintained.

- New features added monthly.
- Support latest NDN specs.

Code Sample: Endpoint, a better "face"

Code Sample: Trust Schema

- Inspired by Pollere Inc's Versatile Security Toolkit.

```
site = a/blog
root = <site>/<_KEY>
admin = <site>/admin/<_admin>/<_KEY>
author = <site>/author/<_author>/<_KEY>
article = <site>/article/<_category>/<_year>/<_month>

article <= author <= admin <= root
```

NLSR Status on NDN Testbed
